Data Retention Policy

Internal policy document | Confidential

1. Retention Schedule

The company retains records for the period required by legal obligations, operational needs, and audit requirements. Data categories with regulatory retention requirements must not be deleted before the minimum retention window has elapsed.

Records related to personnel administration, tax reporting, and contracts are retained according to the approved enterprise retention schedule, which is reviewed at least annually by legal and compliance teams.

2. Destruction and Disposal

When records reach the end of their retention period, they must be securely deleted or destroyed using approved methods. Paper records may be cross-shredded or securely destroyed by an authorized disposal vendor.

System administrators must document deletion activities and maintain evidence of disposal for regulated records. Discrepancies or exceptions must be escalated to the Records Management Office.
