Expense Reimbursement Policy

Internal policy document | *Confidential*

1. Scope

This policy defines allowable business expenses and the expectations for reimbursement requests. It applies to employees, contractors with approved travel authority, and temporary project team members.

The organization reimburses reasonable and necessary expenses directly related to work duties, client obligations, and approved travel. Expenses must be supported by original receipts and company-approved accounting documentation.

2. Approval and Submission

All expenses must be submitted within 30 calendar days of the purchase or travel event. Requests without itemized receipts, business purpose descriptions, or manager approval will be returned for correction.

Travel and lodging expenses must align with approved budgets. The company will not reimburse personal upgrades, alcohol, entertainment, or non-business-related purchases.
